

# THE FOLD-AND-CUT BAT

It is possible to fold a piece of paper and cut out a bat with a single cut.

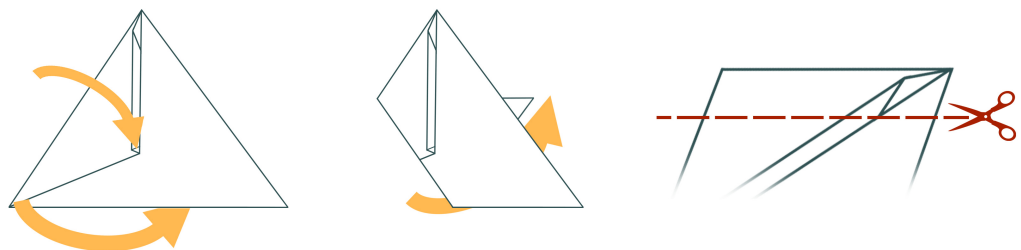

1. Fold a piece of A4 paper in half.
2. Fold a small triangle in a corner (on the crease edge from the first fold).
3. Turn the paper over.

4. Fold the dog-ear edge back about 1cm.
5. Fold the whole top-left corner down.
6. Turn the paper over

7. Fold the top-left corner down.
8. Fold the bottom-left corner behind the paper until it pokes out.
9. Cut through parallel to the edge so you clip that tiny triangle.
